

## Vehicle Turntables For Residential & Commercial Use

Tired of backing out onto a busy street, or struggling to turn around in a limited yard space? Hovair Systems has been manufacturing custom-built turntables for over 30 years and can advise on how you can make your life so much easier by installing a turntable which will remove all your tight-space turning and backing out problems.

Here are some of the great features and benefits to installing a Hovair Systems turntable at your location:

- Garage or driveway installation
- Easy-to-follow drawings for your contractors
- Requires only a 3-5 inch shallow pit
- Air film or electro-mechanical operation
- Panel-mounted and/or remote control options
- Diameters to suit most car & truck sizes
- Affordable, safe and easy to use
- Low profile design
- Improves property value
- Virtually maintenance free

### Here's A Typical Turntable Design
